

The Geological Society of America's Geology and Health Division is pleased to announce the availability of two new research grants.

The grants will be for up to \$4,000 each, one for a graduate PhD candidate and one for a Bachelors or Masters Degree candidate.

Eligibility: Full-time graduate and undergraduate student members of the Geology and Health Division as of **March 1, 2014**.

Candidates must submit their proposal on a topic that conforms to the definition of Medical Geology – *The study of the impacts of geologic materials and geologic processes on animal and human health* – by **April 1, 2014**.

Application: The proposal should be no longer than 7 pages, 1.5 line spacing, 12 pt New Times Roman type, and include an abstract, description of the research project, objectives, anticipated benefits, how the funds would be used, a proposed timeline, and all figures, tables and references.

The proposal must be accompanied by a letter from the student's adviser or Department chair acknowledging full-time status and that the student is the principal researcher on the project.

The successful candidates may also be eligible for financial support to present the results of their research project at a future GSA or MEDGEO conference.

The proposals should be submitted to Bob Finkelman (bobf@utdallas.edu) by midnight, Central time, April 1, 2014.

Decisions will be announced by May 1, 2014.
